Dear Mr. Nichols:

Please find enclosed construction permits for the above referenced sources. It is important that you read and understand the requirements specified in these permits. Particularly, you must apply for an operating permit for each source within 60 days prior to each permit's respective expiration date.

Since you have already completed construction of the above referenced sources, you may immediately apply for the operating permits by mailing a completed APC-100 application (one per each above referenced source) to the letterhead address, or email a copy of each signed, completed application to Air.Pollution.Control@tn.gov.

If you have any questions regarding these permits, please contact me at 615-532-0535.

Sincerely,

John Fuss, Section Manager
West Tennessee Permit Program
